Honorable Hugh Scott
Minority Leader
United States Senate
Washington, D. C. 20510

Dear Senator Scott:

I share the concern of the President over the proposed publication of material in a report on the subject of assassinations which has been prepared by the Senate Select Committee to Study Governmental Operations With Respect to Intelligence Activities.

I must also register my deepest concern and opposition to publishing the names and identification of all individuals alleged to be involved because of possible impairment of foreign intelligence capabilities but more importantly it would unnecessarily endanger lives.

It is my firm belief that publication of such detail is neither in the best interests of our country nor necessary to achieve the objectives established by the Senate for the Senate Select Committee, which, it is believed could be substantially and possibly fully, accomplished by reporting conclusions and recommendations for further legislation or other Governmental action, not details. If there is any justification at all for publishing names and identifications of individuals alleged to be involved, it surely is limited to those who may have been elected officials or appointed by the President, by and with the advice and consent of the Senate, and does not extend to subordinate personnel.
